11. External Factors and/or Development Considered in Program Planning

11.1 Economic Circumstances/Development (The demand of the market, Stakeholders and Alumni)

Currently, tourism has become more important and can bring a lot of income into the country. With the rapid growth of the tourism industry affecting the employment rate of the country's population, the WTTC report said that in 2015 the tourism industry generated more than 1,946,000 jobs (about 5.3% of the country's total employment rate) and it is predicted that in 2025, the employment rate will increase to 2,157,000 jobs. There are also employments in other businesses related to tourism business more than 4,110,000 positions and it is expected that in 2025, the employment rate will increase to 4,767,000, such as souvenirs, restaurants, entertainment businesses, etc. (Mongkolnimit, 2021).

The increasing revenue from tourism results in a higher demand for personnel, particularly those with a background and experience in the hospitality industry or those trained to have the knowledge and skills in the hospitality industry. Since Thailand is a prime tourist destination and the competition is becoming more intense in Asia, the tourism and hospitality industry needs knowledgeable and skilled personnel in its competition in both domestic and international labor markets. Moreover, economic cooperation among countries in nearby regions such as the specification of national and international standard competencies of personnel in tourism and hotel industry and the ASEAN Charter concerning the qualifications of professional personnel in tourism and hospitality industry have enabled the freedom of professional mobility in the ASEAN countries from 2015 onwards. This offers more opportunities for Thai people to increase their potential, especially regarding foreign languages. Thailand's policy vision for economic development or the government's economic development model of "Security, Wealth and Sustainability" has an important mission to drive forward a national reform in various aspects to correct, organize, redirect and create means with which to develop the country and handle new forms of fast-changing opportunities and threats. The national economic development follows the concept of "Thailand 4.0" which aims to create "New Engines of Growth" that generate high income and adjusts the economic structure into a value-based economy, or an economy driven by innovation. The concept is based on the idea of converting "commodity products" into "innovative products". This requires switching from the reliance on industries to drive the national economy to a drive forward by technology, creativity and innovation as well as switching the focus from the production sector to the service sector.

Education in the age of Thailand 4.0, therefore, requires more than preparing the workforce by giving them knowledge. Learners must be encouraged to nurture the love of learning, morality and ability to live with others. Workers in today's economic climate are required to have 21st-century skills that emphasize critical thinking. As Thailand 4.0 aims to develop the country to increase income and overcome the middle-income trap through innovations and international trade, the educational sector needs to make a concrete reform in many aspects, one of which is the development of the English language skills that are necessary for international communication, exchange of knowledge, cooperation and commerce.

The 20-Year National Strategy (2017-2036) projects a vision for "a country that enjoys security, wealth and sustainability and a developed country based on the philosophy of sufficiency economy". The strategy aims for development that brings about happiness and generates national interests from the development of life quality, high income, happiness, security, equality, justice and economic competitiveness.

Education in events, hotel and tourism focuses on the process that gives the individual a set of principles and all the necessary skills to interpret, evaluate, and analyze. It also develops the students' critical abilities and promotes an understanding of conceptual issues to contribute to professional and intellectual development (Cooper & Shepherd, 1997). Education in event, hotel and tourism is a constantly expanding and increasingly diversifying global industry. Therefore, the main responsibilities of education in event, hotel and tourism are to develop the management skills of graduates to develop and continuously fulfill the needs of event, hotel and tourism and to provide the necessary information to seek new ways to do this (Barkathunnisha et al., 2017; Dale & Robinson, 2001; Kim & Jeong, 2018).

The information defined for education in event, hotel and tourism should include topics such as understanding the meaning and nature of the industry, the structure of the industry, the dimensions and measurement issues of event, hotel and tourism, the importance and effect of event, hotel and tourism, marketing of event, hotel and tourism (Fidgeon, 2010). An effective

and efficient education in event, hotel and tourism will increase the quality of staff, provide employees with practical skills and knowledge, provide a solid integrative framework for employees, and enable employees to identify the various sectors of tourism (Cooper & Shepherd, 1997). Therefore, education in event, hotel and tourism, with its versatile features, is one of the main sub-sectors and it can affect the whole industry directly or indirectly (Ayikoru et al., 2009).

Naresuan University International College, perceiving the significance of the development of quality students who are able to make great contributions to the organizations they choose to work for, designs an outcome-based study program that emphasizes student-centered learning with lecturers acting as facilitators, switches lecture-based learning to activity-based learning and implements the concept of the labor market's demand for individuals' competencies that can be assessed more practically than educational degrees.

For this reason, the assessment methods are conducted based on the graduates' skills and are not restricted by forms, means or processes of skill acquirement. This enables education to employ a variety of pedagogical approaches and encourages an exchange and sharing of teaching and learning approaches, and, as a result, the graduates will embody the qualifications desired by their stakeholders, namely the 21st-century skills and lifelong learning skills. In addition, in outcome-based education the instructor must set expected outcomes for learners and inform them of what they are expected to be able to do when they have completed the course. Based on the expected outcomes, the instructor designs learning activities that aim towards the outcomes. Outcome-based education, therefore, is implemented with activity-based learning. The person who develops the learners is not the instructor, but the learners themselves. The instructor acts as a facilitator in the learning process who helps the learners to think and learn by themselves. The learning, therefore, is student-centered.

Outcome-based education employs activity-based learning which includes problem-based learning, project-based learning and service learning. The learners are required to summarize lessons regularly in the form of reflections to share and learn from one another. The outcomes are evaluated to encourage the learners' self-improvement and to enable the instructor to assess the learning methods and adjust them if necessary.

For the benefits of the learners, the learning experience is facilitated to cater to their interest and ability through interdisciplinary approaches so that the learners can adjust their

behavior and make use of the knowledge, skills and attitude to create work and solve problems in their daily life. NUIC emphasizes integrated management that enables the students to employ interdisciplinary knowledge and skills to solve problems in real life and create conceptual connection from the transfer of learning that turns classroom lessons into practical uses, reduces content redundancy and allows more time for new contents, and responds to various aspects of the students' multiple intelligence. The integration of knowledge and the learning process focuses on making use of knowledge in practical solutions to real problems and on integrating courses to generate knowledge, attitude and actions that truly suit the students' interest and needs.

11.2 Social and Cultural Circumstances/Development

In the pursuit of modernization and the promotion of development within a country, many developing nations have chosen tourism as their preferred growth mechanism. During the process of development, it is often economic indicators that draw the most attention and tourism is seen as attractive as it is argued that it generates foreign exchange, increases employment, attracts development capital, and promotes economic independence (Britton, 1982). As it creates jobs and generates income, 'tourism is. . .said to promote a level of economic development conductive to increase social well-being and stability' (Weaver & Opperman, 2000). Tourism has always been regarded as a means of encouraging economic development, but it has not been seriously considered as a means of promoting social and cultural development. The concept of socio-economic development emphasizes the improvement of various indicators, including improvements in living conditions and the quality of life and well-being of populations. Often, these indicators include decreasing mortality rates, increased literacy rates and access to health care and clean water supplies, as well as broader socio-political aims, such as improving freedom of choice, increasing political autonomy, promoting the opportunity for endogenous decisionmaking and the encouragement of self-reliance. The extent to which tourism can contribute to the improvement of these indicators is difficult to say. One of the reasons for the lack of clear understanding of the impact of tourism on a society is the fact that tourism development is often only a smaller part of larger development schemes, such as national economic development or regional economic improvement plans. In addition, for many of these broader indices, there is no explicit guideline as to what constitutes a necessary level of 'improvement' of these conditions in various cultural and social contexts.

12. Impacts of Factors in 11 on Program Development and Its Relevance to Institutional Missions

12.1 Program Development

In this cycle of studies, issues of event, hotel and tourism and their dimensions are addressed, based on conceptual knowledge of theoretical thinking of trends in the area. The event, hotel and tourism in this context are understood as both an economic activity and as a cultural phenomenon, an intellectual search of social dimensions, along with the economic nature, whose fundamental elements of event, hotel and tourism are customer satisfaction, competitiveness and collaboration, the design and improvement of services, the management of the relationship between customer-service and management of event, hotel and tourism services. Knowing the dynamics and its implementation, the action of the event, hotel and tourism professional, in the various working contexts, it is claimed as a distinctive opportunity, innovative, enhancer of quality system and increased competitiveness, either in the companies or in the tourist destinations.

The program will expand the offer of undergraduate training in the emerging fields of event, hotel and tourism, contributing to regional and national economic system. Students will be encouraged to produce based on the strong relationship with industry organizations, which will be integrated into research projects and invited to contribute to the study of labor market needs. It is intended, with this program, promote the creation of synergies in cooperation with the event, hotel, and tourism system organizations, for the development of the territories and the various dimensions associated with them.

The aim is also to develop academic exchange with other national and international institutions of higher education. In short, the students will be granted the powers enabling them to actively contribute to the positioning of event, hotel, and tourism to an entrepreneurial level, innovative and imbued with thought directed to people, communities and their heritage and culture.

1. Philosophy, Significance and Objectives of the Program

1.1 Program Philosophy

The Event, Hotel and Tourism Management Program (International Program) aims to produce event, hotel, and tourism professionals with potential and ability to adapt efficiently to global changes and cultural diversity.

1.2 Summer Semester

None

1.3 Credit Transfer in Semester System

According to NU regulations on undergraduate study B.E. 2559 No. 5.1

2. Program Implementation

- 2.2.2 Direct Admission Criteria according to Naresuan University International College
- 2.2.3 GED score depends on the announcement in each academic.

2.3 Limitations of Newly Enrolled Students

Newly enrolled students could face many challenges related to the required adjustment from the familiar learning context in high school to the learning context of the university.

(1) A lack of English skills is one of the crucial challenges that new students face right away at the beginning period of their study at NUIC.

- (2) Less time management skills inside and outside the classroom and various activities could affect the study results of new students.
- (3) A lack of specific goals for education can become critical obstacles that hinder new students' adjustment to the university system.

2.4 Strategies to Resolve Students' Limitations in 2.3

- Provide an orientation for new students to guide them to set life goals and to introduce them to the techniques of studying in a university and time management.
- Assign academic advisors to every student so that the advisors can provide close supervision and advice.
- Assign NUIC Student Affairs Unit to give assistance to the academic advisors, to hold activities related to the students' needs such as Students-Advisors First Meeting and Parents-Teachers Meetings, and to follow up on the first-year students' grades with their academic advisors.
- Promote the students' participation in academic and social activities and projects; for example, undergraduate student orientations, intensive English courses, study skills/work skills/life skills projects and tutorial sessions.

4. Components Related to Field Training Experience, Professional Internship and Cooperative Education

Naresuan University implements a policy to design study programs based on the Outcome-based Education (OBE) concept that enables Activity-based learning; for example, having students act as instructors while the teacher acts as a facilitator to provide the learning process that fosters the students to think and learn by themselves. OBE involves Activity-based Learning (learning from hands-on activities), Problem-based Learning (learning from real problems), Project-based Learning (learning from conducting projects) and Service Learning (learning from social or community services that emphasize the responsible use of knowledge). The students summarize the lessons regularly as their reflections to share and learn from one another.

For the efficiency of the graduate production, NUIC aspires to create international-standard education opportunities to meet the social demands in the age of a borderless world and to produce moral and ethical graduates who possess the desired characteristics of the 21st century.

Therefore, it is important to increase the students' experience, knowledge and quality to meet the international standards and to become global citizens who possess the ability to adjust to the work environment with cultural diversity.

In order to produce graduates in the International Tourism and Hospitality Management Program to meet the 5 domains of standard learning outcomes according to Thailand Qualifications Framework, namely 1) Morality and Ethics, 2) Knowledge, 3) Cognitive Skills, 4) Interpersonal Relation Skills and Responsibility, and 5) Numerical Analysis, Communication and Information Technology Skills, the program perceives the importance of the students' professional internship both as Cooperative Education and as Professional Training in workplaces for which the students' work hours are counted and accounted for. This helps them learn and add to their professional experience in real situations of the workplaces and enables them to work straight away after graduation. The internship also fosters the students' positive professional attitude, ability to work with others, responsibility, and self-development as a student-trainee and promotes the academic development of desired characteristics in graduates.

Standard of Learning Outcomes for Field Training Experience/Professional Internship/Cooperative Education

1. International Academic or Professional Training

- 1.1 The ability to operate the assigned work in the company/ organization and work as part of the organization and colleagues.
 - 1.2 The ability to implement the knowledge and theory in work.

3. Cooperative and Work Integrated Education (CWIE)

3.1 Rationale

Cooperative and Work Integrated Education (CWIE) is the curriculum which is featured among the higher education institutions and the enterprises (e.g. public, private, community) in order to prepare all graduates to be ready for working immediately and to have the competencies that match with the needs of market. Also, to equip students to be able to develop and adjust themselves in career and to prepare themselves for future positions.

Cooperative Education and Cooperative and Work Integrated Education (CWIE) is one of the mechanisms for teaching and learning at higher education institutions and external agencies which systematically work together by providing the opportunities for students to study

in the institutions of higher education and parallel with the real practice in external agencies (Work-based Learning) in all forms of learning. Therefore, students who joined CWIE will have competencies in knowledge, skills, attitudes and values for the real world of work. Moreover, students also have characteristics which meet the needs of the job market and ready for working in various formats such as Sandwich Course, Practicum, Post-course Internship, etc.

The Association of Cooperative Education and The World Association for Cooperative & Work-Integrated Education (WACE) had signed the Global Cooperative and Work Integrated Education Charter with many countries on August 5th, 2019, to express the commitments and push higher education institutions across the world to change the direction of teaching and learning to be CWIE in order to create graduates to be competencies to enter the world of work in the modern era and to be able to study and work in different countries. CWIE also aims to provide all students with equal accessibility to have more experience in internship aboard.

In order to develop an up-to-date program to meet the national and international standards and to produce graduates who are desired by the tourism labor market and who have the morality, ethics, knowledge and ability suited to work and live happily with others, the program designed the study plan for Cooperative and Work Integrated Education (CWIE) in cooperation with workplaces that could provide professional internships to the students from Semester 2 of Year 2 to Semester 2 of Year 4 under the supervision of the lecturers in charge of the program who serve as the students' university supervisors and who work with the work supervisors from the workplaces under the Cooperative and Work Integrated Education (CWIE) agreement.

- 1.2 The lecturers and departments in charge of the courses must ensure that the teaching and learning and the evaluation of the outcomes follow the details provided for the courses.
- 1.3 The thesis advisors and thesis committee must ensure that the thesis courses and evaluation follow the quality control procedures set by the university and the college.
- 1.4 Require all full-time and part-time lecturers to have at least a Master's degree or a comparable qualification or an Assistant Professor position in the field of the course contents or in a related field.
- 1.5 Require a revision of the program according to a specified timeframe, or every 5 year, by updating the program based on the annual evaluation results and performance reports.

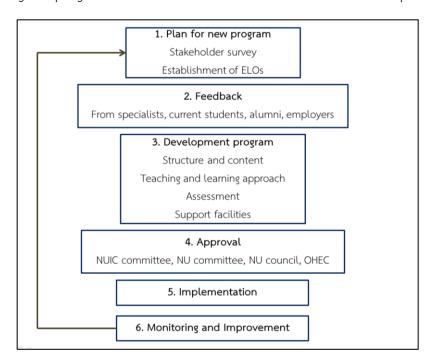

Figure 1 Structure of curriculum management

2. Graduates

The employability of graduates is established and monitored. The main indicator is the employability rate of graduates. The academic advisor, academic affairs staff, and student affairs staff would advise and encourage the students to study and join all activities, which could lead

to the ELOs accomplishment. Survey of graduates towards the curriculum has also been conducted to check the feedback and seek improvement areas.

The program studies the demands of the labor market and society and/or the employers' satisfaction towards the graduates, the details of which are as follows:

- 2.1 The Program Committee monitors the production of graduates to ensure that their qualifications meet the demands of the labor market, society, and the workplaces in both public and private sectors.
- 2.2 The program surveys the employers' satisfaction towards the graduates and follows up on the graduates' professional advancement according to the criteria in Thailand Qualifications Framework for Higher Education.

3. Students

3.1 Student Admission and Pre-Sessional Preparation

- 3.1.1 The program specifies the qualifications of applicants based on the standard criteria for undergraduate studies and Naresuan University Regulations for Undergraduate Studies. The Program Committee participates in the recruitment based on the applications and attached evidence.
- 3.1.2 The program provides an orientation for new students prior to the beginning of the academic year to enable the students to adjust and to introduce learning techniques, university rules and regulations, facilities provided by the university and the college and the students' academic advisors. Moreover, the Program Committee organizes an English language and academic subject preparation project every academic year to assist the first-year students in their adjustment to the study at the higher education level.

3.2 Student Promotion and Development

- 3.2.1 Collaborate with other organizations in Thailand and abroad in student exchange programs to develop the students' life and language skills.
- 3.2.2 Provide community services to take part in community development and to integrate the activities in the program's courses as part of the promotion of the 21^{st} -century learning skills.

3.2.3 Promote professional experience and hands-on problem solving through Cooperative Education.

3.3 Student Supervision

- 3.3.1 The Program Committee provides an advisory system to support and give advice to the students and arranges timetables for the students to meet with their advisors who give consultation regarding the study plan, research for learning development and various regulations all through the students' study period.
- 3.3.2 The lecturers in charge of the program monitor the students' retaining and graduation rates according to the program's study plan.
- 3.3.3 The Program Committee surveys the students' satisfaction with the program and learning facilities and makes use of the results in the program administration.
- 3.3.4 The Program Committee summarizes the students' complaints (if any) and reports them to the college every semester.

4. Lecturers

4.1 Recruitment and Appointment of Lecturers in Charge of the Program

- 4.1.1 The program aims to appoint 5 lecturers to oversee the program. The lecturers' qualifications must meet the university's standard criteria for undergraduate programs as well as the program's duties and responsibilities.
- 4.1.2 New lecturers are recruited according to Ministry of Education's standard criteria for undergraduate programs, their understanding of the program's objectives and goals, their ability to use English as a medium of instruction and to accomplish the college's missions, their knowledge and skills in classroom management and learning outcome evaluation, and their research and professional experience in the field of the program. The candidates are recruited and interviewed by a committee appointed by the university. The newly appointed lecturers are given an orientation by the college during which the colleges and the university's rules and regulations and the details of the program administration are provided.

4.2 Lecturer Management

4.2.1 The program makes plans for the management of the workforce. The lecturers in charge of the program are given the details of the workload based on their respective

qualifications and skills. They can also comment on the workload and assist in the development of guidelines for teaching and learning.

- 4.2.2 The lecturers participate in the development of guidelines for teaching and learning in meetings during which they plan for course instruction, evaluation, assessment, and verification. The information is further employed in the improvement of the teaching and learning as well as of the program.
- 4.2.3 The lecturers exchange methods for student development as well as for creating activities and projects that can strengthen the desired characteristics of students as specified in the program.
- 4.2.4 The lecturers review and revise the program based on their experience of the teaching and learning process, the development of the desired characteristics of the students and the problems related to the implementation of the program. A revision program is scheduled to be undertaken every 5 years.

4.3 Lecturer Promotion and Development

The program follows NUIC's system and mechanism in the promotion and development of the academic knowledge and ability of the lecturers in charge of the program. NUIC allocates a budget of 10,000 Thai Baht/year for each lecturer's development. This budget can be used for attending meetings, seminars, and training. The college also organizes activities to enhance the lecturers' research and teaching potential.

Each academic staff has been informed that doing research is one of the five main responsibilities of being an academic staff. The criteria for doing research are explained in the faculty manual. NUIC encourages the academic staff to conduct research by providing budgets for doing research. Moreover, NUIC also arranges several types of activities for academic staff such as research forum, knowledge management, and research training.

5. Program, Teaching and Learning, Student Evaluation

Students' achievement of ELOs are frequently assessed. As accomplishments of CLOs can lead to the achievement of ELOs, CLOs are assessed every semester by TQF5 and course review.

The alignment of CLOs with ELOs and the achievement of CLOs would be inspected in the course review session. However, understanding of academic staff members is very essential. All members of the curriculum should be able to construct the CLOs aligned with ELOs to ensure that ELOs would be accomplished. Thus, the meeting and some sessions would be held for discussion.

Student assessments, including timelines, methods, regulations, weight distribution, rubrics, and grading criteria are explicitly described in course syllabus distributed to all students at the beginning of the course. Also, students' workload is concerned and discussed in the lecturers Meeting) to ensure that student's workload is appropriate.

- 5.1 The program and the course contents are designed according to Naresuan University's program development procedure and updated and revised every 5 years.
- 5.2 The course lecturers are designated in meetings where the lecturers plan for course instruction and workload based on qualifications, experience, and evaluation results by students.
- 5.3 The program provides a guideline for course instruction that integrates key 21^{st} century skills in the teaching and learning activities.
- 5.4 The lecturers in charge of the program cooperate in the production of graduates and in monitoring, following up and uploading TQFs 3-6 to the TQF Management System.
 - 5.5 The verification of the students' learning outcomes is as follows:
- 5.5.1 Review and verify the quality of the learning outcomes and the assessment process based on the information in TQF 3, evaluation results of the course lecturers by the students, and course evaluation by the lecturers. The results are used to improve the course contents and the program.
- 5.5.2 Review and verify the learning outcomes after graduation by graduates and their employers.

6. Learning Resources

NUIC allocates an annual budget the program to procure books and printed materials and surveys the lecturers' satisfaction with the learning facilities such as classrooms, audio-visual equipment, computer network system, Reading Room, and the general conditions of the building and environment. The lecturers in charge of the program are encouraged to provide suggestions regarding learning facilities essential for the program and the students.

In addition, NUIC encourages the lecturers and the students to propose a list of books and printed materials to be procured within the allocated budget. The Program Committee assesses the suitability of the proposed books before submitting the list to the college. Moreover, the lecturers and the students can submit a list of books from NU Book Fair according to an allocated quota (in the form of coupons) to be procured by the university's central library.

The program considered the benefits of the suggestions from the lecturers and students and perceived the importance of their recommendations. The program, therefore, procured the following computer licenses to facilitate teaching and learning:

- O Amadeus (used by travel agencies to reserve travel tickets)
- O SPSS (used for statistical analyses and data management in research studies)
- O EndNote (used to manage references by searching, storing, and formatting references for teaching and learning and for research studies)

Online teachings are conducted by using Microsoft Team. The students can access the research data based online by NU search. The computers are provided in NUIC computer room on the second floor, the student lounge on the first and third floor, and NUIC Self-access. NUIC also has interactive boards in Room 303, 304, and 305.

7. Key Performance Indicators

Assessment Criteria for the Approval and Promotion of the Program's Performance

A curriculum that meets the standard of Thai Qualifications Framework must qualify for the following conditions: (1) the compulsory KPIs (numbers 1-5) must be achieved, and (2) the total number of the achieved KPIs must be no less than 80 percent in the year of the assessment for at least two consecutive years for the Program to be approved of its quality and further promoted. The Program is required to maintain the assessment result at the 'good' level for the consistency of the graduate quality development.

Section 8 Evaluation and Improvement of the Program Implementation

1. Assessment of Teaching Effectiveness

1.1 Assessment of Teaching Strategy

Before a semester starts, the lecturers' teaching strategies should be evaluated by the teaching team or the department and/or experts in curriculum and teaching. After the semester, the students' evaluation of the lecturers' pedagogy and the students' learning results should be analyzed.

Problems and recommendations mentioned in the evaluations can be used to improve the teaching effectiveness of the lecturers, and the results can be recorded in reports.

1.2 Assessment of the Lecturers' Skills in Applying Teaching Strategies

The assessment of lecturers' skills can be done using the following:

- Course evaluation by students
- Observation by lecturers in charge of the program, program chair, and/or the teaching team
 - Overall program evaluation by new graduates
- Tests of students' learning outcomes compared with those from the same type of program in other institutions

2. Overall Assessment of the Program

As 2020, NUIC recognizes the importance of quality in higher education, and the need to develop a holistic quality assurance system to raise academic standards and enhance education, research, therefore AUN-QA Assessment at Program Level was implemented. The AUN-QA assessment models for higher education comprise strategic, systemic, and functional dimensions. These dimensions are subjected to internal and external assessment.

Version 4.0 of the AUN-QA model for program level assessment encompasses the following eight criteria:

- 1. Expected Learning Outcomes
- 2. Program Structure and Content
- 3. Teaching and Learning Approach

- 4. Student Assessment
- 5. Academic Staff
- 6. Student Support Services
- 7. Facilities and Infrastructure
- 8. Output and Outcomes.

The overall program assessment can be done through a survey of graduates' achievements as well as surveys with Program stakeholders (students/new graduates, employers, parents, external experts, and government).

The pass rates and dropout rates are established and monitored. The academic advisors, academic affair staff, and NUIC would monitor the pass rates and dropout rates. The employability of graduates is established and monitored. The main indicator is the employability rate of the graduates. The academic advisor, academic affairs staff, and student affairs staff would advise and encourage the students to study and join all activities, which could lead to the ELOs accomplishment.

The satisfaction levels of employers have been established and monitored. The information would be collected from employers at Cooperative Education workplace of each student after completing the Cooperative education training. NUIC has analyzed that information to monitor the quality of NUIC students and prepared for the next batch of students before going out for the training

3. Assessment of the Program Implementation Based on the Program Specification

The program must pass the program-level quality assurance and implement the teaching and learning according to the standard specified in **Thailand Qualifications Framework** for Undergraduate Education in Tourism and Hotel Business as well as the additional indicators. The program is also assessed by the assessor of **AUNQA**.

The assessment was conducted annually with a method **self-assessment procedure**. AUN-QA components for program-level assessment section is the main part portraying how our academic programs comply with the criteria required for accreditation. The first assessment was conducted in 2020 and later 2021. Strength and Weakness Analysis lastly summarize our findings of the good points and room for improvement.

4. Procedure for the Review of Evaluation Results and Plans for the Revision of the Program and Teaching Strategies

Teachers creating the alignment between the course objectives and the way the course is conducted, delivered, and assessed. This is when a backward curriculum design approach comes into play. It is a process that is used to design learning experiences and instructional techniques to achieve specific learning goals. It begins with the objective of a lesson or course and proceeds backward to create an assessment to measure the learning and prepare a sequence of activities/contents that assist students achieving those goals.

When the course starts with the end goal, students know what they are expected to learn and perform, and the teachers are provided with a structure they can follow when creating a curriculum and planning an instructional process.

The assessment strategies for going online involve three factors: reweighting, redesigning, and digitizing. Regardless of assessments, lecturers provide evidence that students have achieved the **intended learning outcomes**. Therefore, the teachers might consider reweighting the previous assessments, and eliminating the final assessment if the previous exams have already provided enough information that the students successfully demonstrate the **course learning outcomes**.

If reweighting the assessment is not an option, teachers might focus on redesigning a new assessment that better responds to online learning & teaching approaches, covers the area of learning outcomes, and allows students to demonstrate what they have learned.

Stakeholders' needs and feedback serve as input to curriculum design and development. A survey of employers has been conducted every year to evaluate the student's abilities, skills, and performance during the cooperative education period and after graduation. The survey of 4th year students/graduates towards the curriculum has also been conducted to check the feedback and seek improvement areas.

The curriculum design and development process are established, and it is periodically reviewed and evaluated. Enhancements are made to improve its efficiency and effectiveness. The stakeholder's needs and feedback would be surveyed every year and applied in the curriculum design and development process.

ไม่มี

ระเบียบวาระที่ 3 เรื่องสืบเนื่อง

ระเบียบวาระที่ 4 เรื่องเพื่อพิจารณา

4.1 เรื่องเสนอแนะจากกรรมการวิพากษ์เพื่อปรับปรุงหลักสูตรการจัดการอีเว้นต์ การโรงแรม และการ ท่องเที่ยว(ร่าง)

4.1.1 ประเด็นที่ 1 อาชีพหลังสำเร็จการศึกษา

การเขียนอาชีพหลังสำเร็จการศึกษา ควรเขียนจากตำแหน่งเริ่มต้นปฏิบัติงานในระดับปฏิบัติการ หรือบริหารจัดการขั้นต้น เนื่องจากนิสิตที่สำเร็จการศึกษาส่วนใหญ่หากไม่ได้ประกอบกิจการของตนเอง ต่างเริ่มต้น จากระดับปฏิบัติการทั้งสิ้น

4.1.2 ประเด็นที่ 2 การเขียนหลักการและเหตุผล รวมทั้งที่มาที่ไปในการปรับปรุงหลักสูตร

หลักการและเหตุผล ที่มาที่ไป ผลกระทบและความสำคัญของหลักสูตร เนื่องจากเป็นหลักสูตร อี เว้นต์ การโรงแรมและการท่องเที่ยว ดังนั้น การเขียนอธิบายความควรเพิ่มความเชื่อมโยงของทั้งสามศาสตร์และ เกลี่ยให้เนื้อหามีน้ำหนักเท่าๆ กัน ไม่เน้นหนักไปทางใดทางหนึ่งเท่านั้น

4.1.3 แผนการปรับปรุงหลักสูตร

แผนการปรับปรุงหลักสูตรควรแยกหมวดเพิ่ม อย่างน้อยต้องมี (1) แผนการปรับปรุงบุคลากร (อาจารย์) (2) แผนการปรับปรุงนิสิต (3) แผนการปรับปรุงสภาพแวดล้อมทางการศึกษา และ (4) แผนการปรับปรุง หลักสูตร

4.1.4 จำนวนหน่วยกิตของแต่ละ cluster

เนื่องจากชื่อหลักสูตรคือ อีเว้นต์ การโรงแรม และการท่องเที่ยว ดังนั้น จำนวนหน่วยกิตของทั้ง สามศาสตร์ควรจะต้องสมดุลกัน ไม่เน้นหนักทางด้านเดียว ดังนั้นควรต้องปรับปรุงรายวิชา คำอธิบายรายวิชา และ จำนวนหน่วยกิต

4.1.5 เนื้อหารายวิชา

รายวิชาพื้นฐานด้านการบริหารจัดการ เช่น Economics, Finances, Marketing, HRM, Introduction to Business, รวมทั้งรายวิชาทางด้าน ICTs for business เป็นรายวิชาพื้นฐานที่จำเป็นต้องคงไว้ แต่เห็นควรลดทอนความเข้นข้นของเนื้อหารายวิชาทางด้าน mathematics เพื่ออำนวยให้นิสิตสาขาการท่องเที่ยว ตามความจำเป็นของศาสตร์ที่มุ่งเน้นทางด้านการพัฒนาทักษะและสมรรถนะการบริการการท่องเที่ยว การโรงแรม และอีเว้นต์ มากกว่าการคำนวนเช่นศาสตร์ทางบัญชีหรือการเงิน

มติที่ประชุม เห็นชอบดำเนินการตามที่กรรมการวิพากษ์เสนอ
